Dear investor:

Investment opportunities found in Iraq today vary in terms of type, size, scope, sector, and purpose. the door is wide open for all investors who wish to hold investment projects in Iraq; projects that would meet the growing needs of the Iraqi population in different sectors.

Iraq is a country that brims with potential, it is characterized by its strategic location, at the center of world trade routes giving it a significant feature along with being a rich country where you can find great potentials and untapped natural resources which would certainly contribute in creating the decent living standards for people. Such features and characteristics creates favorable opportunities that will attract investors, suppliers, transporters, developers, producers, manufactures, and financiers, who will find a lot of means which are conducive to holding new projects, developing markets and boosting business relationships of mutual benefit.

In this map, we provide a detailed overview about Iraq, and an outline about each governorate including certain information on each sector. In addition, you will find a list of investment opportunities that was classified as per the available investment opportunities in each economic sector in each governorate. This updated map includes a number of investment opportunities that were presented by the concerned Ministries.

As we have published this document to serve your needs and requirements, we will certainly be pleased to receive any comments and suggestions you may raise, and we are gladly willing to cooperate with you to find constructive ways to attract investors who have the intention and willingness to participate in the process of economic renaissance in Iraq.

With all due respect..

Dr. Sami Al-A'raji
Chairman of the National Investment Commission

I hereby invite you to look at Iraq as one of the most important places where untapped investment opportunities are available in various fields and where each sector has a crucial need for investment. Think about the great potentials and the markets of the neighboring countries. Moreover, think about our real desire to receive and welcome you in Iraq , we are more than ready to cooperate with you In order to overcome any obstacle we may face.

Introduction

Investment enjoys a great deal of importance by the Federal Government, the National Investment Commission (NIC) and the Provinces Investment Commissions. They all support investment due to its fundamental role in economic development in a time when economic resources began to relatively decrease. Organizing various types of investments in the national economy is the way for more efficient results compared to leaving investments to personal decisions without planning. Investment programs, governmental or direct investment, is one of the economic policies that enhance economic growth and achieve the country's main goals in building balanced economic development. More over, relation between investment and economic growth is one of the planning factors through which economic trends can be known and focus on main sectors which lead growth in the right direction. Planning can bring back investment according to growth rates to achieve the goals that are important for the future strategies. Investment is the trigger for the new productive energy going side by side with the already existing ones. More investment means more ability for societies to use the unused economic resources represented in technical skills, implementing modern production methods, enhance the types of products, and less cost to compete with local and international markets. In spite of current circumstances, the National Investment Commission stepped forward since its foundation through Law no. 13 for 2006 (amended) to improve development in the country and open up to the outside world. NIC promoted its activities as a new foundation and tried to attract local and international investment in addition to making structural changes in the Iraqi Economy which resulted in establishing a data base for investors' guide.

NIC was the first to support private sector through workshops, seminars and local and international conferences aiming at supporting private sectors and promote international partnership with international companies and Chambers of Commerce. Also, NIC was active in amending several laws linked directly or indirectly with investments to enhance investment opportunities as we believe that governmental investment opportunities will not be able to improve economy without a clear strategy to attract foreign investment to our country. Based on investment projects, NIC signed contracts that require cooperation by all governmental agencies for successful projects. Being professional in dealing with different agencies is the main reason to encourage well-known investors to enter the Iraqi market

depending on NIC's One Stop Shop Dept. which provides services to all investors in addition to issuing visa to investors and staff working in Iraq. Businessmen and investment companies focus on NIC for its transparency and quick response to meet their requirements.

Why Invest in Iraq?

Iraq is characterized by having many factors that would attract capitals and investments, due to the availability of natural resources like oil, gas, lands, and human resources, as well as the large size of the Iraqi market and the geographic position which creates opportunities for production, import, and export. All this represents diversified attracting factors that reflect the diversity of investing opportunities in different economic sectors.

In the light of the change that the economic philosophy of Iraq has witnessed, the goals and the reasons included in the Investment Law (no. 13 for the year 2006, amended) have contributed to attracting foreign investment, , due to the privileges and exemptions to these projects on the basis of the following:

1. Adding the developer concept who could be defined as each natural or corporal person obtaining an investment license in cities construction and investment zones or any other sector suggested by the National Investment commission after obtaining the Ministers council approval, and adding the subordinated developer concept who could be defined as each natural or corporal person to whom a part of the investment project (of the suggested sectors) ownership is transferred to be developed.
2. Inserting the phrase of the mixed sector to investment as law was limited to promote private Iraqi and foreign sector only.
3. Establishing industrial investment projects and warehouses for agricultural sector on agricultural lands in and outside the fundamental designs.
4. Encouraging Iraqi and foreign investors through facilitating easy conditioned loans provided that the investor implements 25% of the project, the loans also granted to the housing projects implementers and to the final beneficiary while this privilege was previously restricted to Iraqi investors only.
5. The new amendment allowed owning the state lands allocated for housing projects by Iraqi and foreign investors against estimated fees if the land was within the fundamental design and without fees if it was out of the fundamental design of the cities.
6. Acquiring or leasing lands for Iraqi investors in order to establish land and industrial investment projects with a lease term up to 50 years that can be renewed (depending on the project's size and type) in addition to allowing partnership with foreign investor.

7. Investing in the halted strategic and federal projects in all sectors for the purpose of completion and rehabilitation.
8. The new amendment obliged the Ministries, independent entities and provincial municipalities to provide the estates / lands suitable for establishing investment projects and in case of not committing to this provision, the Ministers council shall have the right to transfer the estate/land ownership to the National investment Commission without any fees and the Commission in its turn shall have to allocate the estates/ lands for investment projects.
9. Entering and taking out the capital allotted to the project as well as its profits and revenues in accordance with the provisions of the aforementioned law and Iraqi Central Bank regulations.
10. Circulating shares and bonds in Iraqi Stock Market and acquiring membership in joint-stock companies.
11. Creating investment portfolios in shares and bonds.
12. Insuring projects with any Iraqi or foreign insurance company.
13. Opening accounts in Iraqi or foreign currency or both in any bank inside or outside Iraq.
14. Employing and hiring foreign labor in projects alongside local labor.
15. Providing foreign investors and workers the right of residency in Iraq and facilitating the process of entering and leaving the country for them.
16. Open a branch of the foreign company in Iraq.
17. Register patented for his investment project.
18. The new amendment granted exemptions from taxes and fees for licensed investment projects for 10 years starting from the date of operation for each phase of the project phases not to include customs exceptions, while it allowed tax and customs exemptions for the imported assets providing being imported within the construction phases before commencing commercial operation for each phase and according to the fundamental design of the project and the implementation timetable as the law previously exempted the imported assets for three years starting for the date of obtaining the investment license. This was considered an obstacle to investors but it was treated in the new amendment.

The new amendment also exempted housing investment projects from land screening fees, estate registration fees including the fees of transferring housing units' ownership to people.

The new amendment included taxes and customs exemptions granted for environment friendly preliminary materials imported for the purpose of the commercial operation of the national nutrition basket materials, medicines and construction materials and according to the percentage of the local materials contribution in manufacturing which represent support to local productions.

- 1- The new amendment exempted estates/ lands allocated for investment projects from the provisions of the laws and decisions below for their role in hindering investment:
 - a- The law of selling and leasing state owned possessions No. (21) for the year 2013
 - b- The law of Agricultural reclaimed lands No. (35) for the year 1983, the law of Reorganizing agricultural ownership No. (42) for the year 1987 and the law of renting reclaimed agricultural lands No. (79) for the year 1985
 - c- The law of Industrial investment No. (20) for the year 1998 regarding investors keeping allocated land for himself accordingly.
 - d- Provision (second) of the decision No. 850 for the year 1979 as amended by the decision No. 940 for the year 1987
 - e- Decisions of the dissolved Council of the Revolution Leadership No. 581 for the year 1981, 1187 for the year 1982, 222 for the year 1977 and 165 for the year 1994.
19. Granting hotels, tourism institutions, hospitals, health institutions, rehabilitation centers, and educational and scientific institutions additional exemptions from the duties paid on furniture and the material needed for modernization and renewal purposes at least once every four years.
20. Covering strategic partnerships with public sector projects in rehabilitating, operating or establishing in cooperation with private sector by the advantages of the Investment Law.
21. Provide investors with a badge after granting the investment license to enjoy privileges accordingly.

Basic aims of development plans have become achievable, and the investment environment has turned stable because of:

- Adopting an effective economic, monetary and financial, policy that led to create relative stability in inflation rates, which helped in turn to achieve high annual economic growth rates.
- The trend towards activating the private sector's role and expanding its participation in promoting investment and the economy, and opening doors for cooperation with the outside world.

Concept and Importance of Investment Environment

The importance of the investment environment is noticeable in attracting local and foreign investments because it includes fundamental aspects to successful investments and appropriate to investors activity in present and future time. Investment environment includes all policies, indicators and tools that affect directly and indirectly decisions regarding economic policies (financial, monetary and trade) in addition to (legal regulations and infrastructure). It's also related to other factors such as basic facilities, laws and regulations, political and security situation in addition to real investment opportunities, incentives and various markets for production.

We can identify investment environment as (a comprehensive concept focusing on negative and positive circumstances in making investment opportunities successful ones and affect investment mobility. It includes social, economic, political and legal situation, and governmental supporting agencies.)

A Glance at Iraq's Geography

Iraq has a strategic and effective position in the world as it represents a crossroad for the different routes connecting the world continents and a land bridge leading to naval communication routes. Iraq is important on both international and commercial levels. The capital of Iraq is Baghdad. The country consists of eighteen Provinces, three of them, Al-Sulaimanyah, Erbil, and Duhouk, constitute

Kurdistan Region, whereas Basra, Mosul, and Erbil are considered the principal Provinces due to the large areas and large number of population they enjoy. Iraq's main resources are oil, natural gas, sulfur, phosphates, iron, red mercury, kaolin clays, bauxite, limestone, gravel and sand.

Geographically, Iraq can be divided into four main areas: the Western Area, the Southern Area, the Mountain Area, and the Sedimentary Plains Area on the Tigris and Euphrates. The area of the country is about (438,446) km². The population of Iraq is about (38.8) million, 19.6 m male and 19.2m female. Most of them live in urban areas.

Iraq has two main rivers which are Tigris and Euphrates, whose lengths are (1850 km) and (2350 km). Both of these rivers rise in Turkey and meet in Al-Qurna City in Basra Province to form Shatt Al-Arab which in turn flows for another (185 km) before reaching The Arabian Gulf.

Iraq borders Turkey to the north, Saudi Arabia, Kuwait and Gulf to the south, Iran to the east, Syria and Jordan to the west.

Land Borders

The total length of Iraqi borders is (3631) km distributed as follows: (1458) km with Iran, (181) km with Jordan, (242) km with Kuwait, (814) km with Saudi Arabia, (605) km with Syria, and (331) km with Turkey. On the other hand, the total length of maritime borders is (58) km*.

Lakes

There are many lakes in Iraq, the most prominent of them are:

Dowkan Lake, Al-Habaniya Lake, Al-Razaza Lake, Sawa Lake, Darbendekhan Lake, and Al-Najaf Lake.

Dams

Dowkan Dam, Darbendekhan Dam, Al-Therthar Dam, Al-Habaniya Dam, Al-Faluja Dam, Al-Hindiya Dam, Mosul Dam, Duhouk Dam, Himreen Dam, Al-Kut Dam, Samaraa Dam, Qazanya Dam, Al-Itheim Dam, and Hadeetha Dam

Rivers

The Tigris, The Euphrates, Diyala River, Al-Zab Al-Kabeer River, Al-Zab Al-Sagheer River, Shatt Al-Arab River, Al-Idhaim River

Surface Classification

Iraq's surface can be classified into four main areas: the Western Plateau, the Mountainous Area, the Sedimentary Plain Area, and the Undulating Area.

Mountains

Sinjar Mountain, Qaradagh Mountain, Himreen Mountain, Sanam Mountain, Al-Jabal Al-Abyadh, Kara Mountain, Qindeel Mountain, Helgord Mountain, Mateen Mountain, Korek Mountain

Marshes

Al-Hamar Marsh, Al-Huweiza Marsh, Al-Jibayish Marsh, Al-Qurna Marsh.

Islands

Alus Island, Jibba Island, Um Al-Khanazeer Island, Um Al-Russas Island, Hijam Island, Um Al-Babi Island, Al-Sindbad Island.

A Glance at Iraq's Economy

Iraq's economy has showed a good performance for the year 2012-2016, since it varies in its natural, human, and spatial resources. In addition, it has a healthy economic structure. Given all that, it represents a very suitable environment for investments. The following economic, developmental, and social indications support such argument:

Oil Sector

- Oil plays a vital role in the development of Iraq's economy as it contributes to GDP about 60% in fixed prices for the year 2015, and 62% in fixed prices for 2016, and about 32% in GDP for 2015 in current prices in oil sector while it was around 29% for 2016 (according to primary estimation from MoP) and more than 90% of financial revenues.
- Oil sector has achieved a significant rise in production as the conducted researches showed that crude oil production had a noticeable rise during 2015 as it increased from (3.7) million bpd to more than (4.1) million bpd in 2016.
- Gas proven reserves is 130.9f³ trillion and potential reserves is 31f³ trillion.
- Iraq has large potentials and competitive experience in sulfur-related industries. It also produces significant amounts of nitrogen fertilizers and phosphate.

Table (1)

Basic statistics related to oil sector for 2015-2016

Fixed Oil Reserves	142.8 Billion bpd
Fixed Gas Reserves	13.9 trillion cubic feet (TCF)
free Gas Reserves	31 trillion cubic feet (TCF)
Oil Production 2015	3.7 million bpd
Targeted Production 2020	4665 million bpd
Oil exports 2016	4,1 million bpd

*source: Iraqi Ministry of Oil according to its letter no.3911 on 29/1/2017

• Foreign Exchange Indications

The Central Bank and commercial banks have reported a noticeable increase in its foreign assets during 2008-2013, as it jumped from (68.084.967) million Dinars in 2008 to (97.492.510) million Dinars in 2012 to (112,787,829) million Dinars in 2013, whereas liabilities was estimated (3,934,507) million Dinars in 2011, while estimated in 2013 with (3,679,416) million Dinars which reflects foreign assets sedate. In 2014, total foreign liabilities reached 3.485.185 million dinars while total foreign assets reached 104.687,048 million ID which reflects strong foreign assets in banking and monetary authority.

The following table shows foreign liabilities and assets for the period (2008-2014) in million Iraqi Dinars.

Table (2)
Foreign Liabilities and Assets for the period (2008-2014)

* Iraqi Million Dinar

Year	Total Foreign liabilities	Total Foreign Assets
2008	2.043.946	68.084.967
2009	5.767.829	67.910.770
2010	3.806.679	71.922.626
2011	3.934.507	82.980.261
2012	3.608.750	97.492.510
2013	3,679,416	112,787,829
2014	3.485.185	104.687.048

*Source: Iraqi Central Bank – Annual Statistic Journal 2015

Monetary Policy and the Financial Deficit:

The monetary policy has an influence on economic variables as it affects the actual demand and thereby it affects levels of activity, operation and the general level of prices. Of its results will be the balance or deficit or surplus in the general budget but the undesirable matter for any investment environment is to have a big deficit in the budget that leads to inflation or deflation and in the end economic recession. If the monetary policy kept a stable rate of budget deficit, this would be an attractive factor for investment.

- The general expenditure range had expanded in its operative and investment sections during the period of reconstructing the country besides facing terrorism. Raise in the oil revenues had a remarkable effect in financing the state general budget and meeting all internal and external dues and many observers like the International Monetary Fund declared that the budget deficit was less than expected and that with the raise of the oil revenues it will eventually be transferred to financial surplus in a way that eliminate the burden from the general finance during the years (2008-2015).. Oil

revenues declined in the second half of the year 2014 because of the drop in the international oil prices, the matter that affected the state budget and the war against terrorism which took a big part of the operative expenditure and the double of the investment expenditure allocations.

The government has laid a plan to rebound investment projects whether through the federal budget or through the direct investment in order to implement many infrastructure and services projects.

Table (3)
Public Budget for the period 2008-2015
***Values in Million Dinar**

Year	Revenues	Expenditures	Surplus
2008	80.252.182	59.403.375	20.848.807
2009	55.209.353	52.567.025	2.642.328
2010	70.178.223	70.134.201	44.022
2011	108.807.392	78.757.666	30.049.726
2012	119.817.224	105,139,576	14,677,648
2013	113,840.076	119.127.556	- 5.287.480
2014	105,609.846	113.473.517	- 7.863.671
2015	66.470.252	70.397.515	- 3.927.263

*source: Iraqi Central Bank- Annual Statistic Journal 2015

(-) Expenditures were more than revenues which led to Financial Deficit in budget.

**Chart 2 shows the State Public Budget for the years
2008-2015**

Monetary Policy

Investment climate should control the exchange rate and inflation rate because sudden fluctuations in exchange rates have a negative impact on the investment climate, which makes it difficult to conduct a feasibility study for projects and eventually exposure to loss, as well as, the rate of inflation has an impact on pricing policies and the volume of production and thus to restore movement and the impact on costs of production factors. the more expansive monetary policy is, the more attractive to investment. Central Bank of Iraq's continued stable monetary policy, which led to the stability of inflation and interest and that had a positive reflection on the investment climate in Iraq.

Foreign currency rate exchange

Table (4)

US Dollar vs. Iraqi Dinar exchange rates averages for the period (2008-2015)

*** Values in Iraqi Dinar**

Year	Market rate	Auction rate
2008	1203	1193
2009	1185	1170
2010	1186	1170
2011	1196	1170
2012	1233	1166
2013	1232	1166
2014	1214	1188
2015	1247	1187

*Iraqi Central Bank/ annual statistic group

- **Interest Rates**

Interest rates witnessed massive increase in the period (2005-2015), as it reached at some point 23%. Consequently, investment fields were minimized. In order to reverse this situation, the financial authority reduced this rate to 6% and later to 3.5% during 2014. In 2015, interest rate in Iraqi currency was 3.4 in governmental banks, while 3.9 in private banks. Such a move will help expansion in the investment field, as it motivates investors to borrow money locally in order to expand their activities in the economic field, which promotes economic development and economic stability.

- **Inflation Rate**

Annual inflation rates passed 30% in 2007, but it decreased to 2.4% in 2010, only to rise again in 2011 and 2012 to 5% and 6% respectively. The rise concentrated in the prices of food, commodities, and rents, which raised consumer prices record. While in 2014 the inflation rate has reached (2.2%) compared to its value in 2013 as this incensement focused on prices of clothes, housing, health and education. In 2015 it reached 1.44% the increase was in electricity, gas, communication, housing and education.

Table (5)
The Inflation Rate for the period 2014-2015*

* Values in Iraqi Dinar

No	Total of Main Goods and materials	2014	2015	Change rate %

Chart 4 Propotion of Commidity Groups Goods to Inflation Rate for the year 2014-2015

- **Demographic Trends and Economic prosperity**

According to the latest estimation (done by the Central Organization for Statistics and Information Technology in the Ministry of Planning of 2017) Iraq population is about 38.8 million, with an annual average growth of 3%. Hence, Iraq is considered a large, promising, investment-supporting market, especially when we consider the fact that per capita income has increased significantly to reach 6000\$, creating higher demand for different types of commodities, goods, and services, and this in turn will lead to more growth and diversity in the structure and trends of investment activities in Iraq.

- Major sectors are: oil and gas, electricity, housing and infrastructure, transport, health, industry, agriculture, communication, services, education, and tourism.
- Major agricultural products are: wheat, barley, rice, vegetables, dates, and cotton.

GDP

The value of goods and final services produced in a country with a certain period of time. It consists of public and private expenditures, capital structure and changes in exports and imports. GDP is an important indication that reflects the economic stability.

Table (6)

The country's GDP in fixed prices for the year 2007 and according to activities and sectors for the years 2011-2016*

***Values are in billion Dinar**

Code	Activities	2011	2012	2013	2014	2015	2016

*According to Ministry of Planning's Data/Economic Report 2015-2016.

Banking sector

Over the past decades, banks owned by the state in Iraq conquered the whole banking sector activities in contrast to noticeable shrink of the private sector in this field. Non-banking financial institutions were remarked for their weak performance.

To cope with the aforementioned and under the political and economic changes in Iraq after 2003, the government attempted to carry out vast and vary reformations in the various economic/ financial and banking fields. The latter included the reformation of the banking sector, its tools and mechanisms and in accordance with various

views, so as to get rid of the various restrictions and obstacles. This has been through the revision of the codes and bylaws led by the aim of concentrating on competition and opening the local financial market to the international markets, as this openness insures the enhancement and development of the banking system to face the elements and factors of competition and risk, in addition to the technological development and big advancement achieved in the communication and information systems. This development has led to the reduction of the cost of the financial procedures over the borders, the enhancement of processing data and accountancy systems, and reflected, eventually as benefits, whether for the banks or their customers.

The structure of the banking system in Iraq varies between governmental and commercial private banks. Governmental banks in Iraq mounted to (7) specialized banks (Al-Rafidain bank, Rasheed bank, Cooperative agricultural bank, Industrial bank, Estate bank, Trade Bank of Iraq and Islamic Al Nahrain bank), while the commercial private banks amounted to (50) banks.

Iraqi Stock Exchange Market

Province of Baghdad

Historical Background

Province of Baghdad is the capital of the Republic of Iraq. It is situated on the Tigris River. It is the biggest city in Iraq; the second biggest city in the Arab world after Cairo, and the second biggest city in Western Asia, after Tehran, the capital of the Islamic Republic of Iran. Baghdad is an important point as roads, air, and trains cross at it. It is regarded as the economic, administrative, commercial and educational center and GOI headquarter.

Baghdad has been the most important center of the various sciences in the world. It had been the meeting spot of scholars and learners for many centuries. Baghdad has several names, such as, Al-Mudawwarrah (the Circular), Al-Zawra (the Deviated), and Dar Ul-Salam (House of Peace). Tigris River passes through the city, dividing it into two halves: Karkh (Western part) and Rusafa (Eastern part).

Baghdad has a lot of historical and civilization sites, most important of which is Al-Mustansiriyah School, ancient Islamic mosques, ancient palaces, and the National Museum which embraces the most important civilization, Mesopotamia. .

- **Area:** Baghdad has the area of 4.555 km².

- **Population**

Inhabitants of Baghdad are approximately (8.318.696), eight million and three hundred eighteen thousand, six hundred ninety six persons. Almost 83% of the inhabitants of the capital are concentrated in the City of Baghdad itself, while 17% of them reside in its countryside and outskirts as Baghdad is the biggest city in Iraq and the second in area in Asia. These data shows that the density within the municipal boundaries of the city is extremely high. This high density requires more and more housing complexes and other various economic activities.

• Main cities

Rusafa District, Karkh District, Kadhimiyah District, A'adhamiyah District, Al-Sadr District (1), Al-Sadr District (2), Madaien District, Abu Ghraib District, Mahmoudiyah District, Taji District, Tarmiyah District.

• Bridges in Baghdad:

Muthanna Bridge, Aa'ima Bridge, 14th of Ramadhan Bridge, Iron Bridge, Bab Al-Muadham Bridge, Shuhada Bridge, Ahrar Bridge, Sinak Bridge, Jumhuria Bridge, 14th of July Bridge, Jadria Bridge, Hasanain Bridge, Dora Bridge.

• Main activities

The most important activities at the Province of Baghdad are concentrated in the following fields:

Oil refining, light industries, financial services, food manufacturing, tobacco, furniture, printing, construction, chemical and plastic material production, and electric devices.

Economy at a Glance

The capital Baghdad is regarded the center of the main and commercial activities. The main important oil industries are concentrated in it. Among these industries is Eastern Baghdad oil field which includes the biggest fixed reservations, in addition to many innovated and traditional industries among which are leather, textile, cement, and tobacco industries.

Baghdad, as well, is a vital and crucial center of financial and banking exchanges through its financial and banking sector (state and private). The most important specialized universities, schools, specialized institutes, state and private hospitals are located at it, in addition to a wide net of roads, international and local transport lines.

• Infrastructures

- There is a wide net of main roads and highways which link the capital to its south, north, east, and west. Among the most important of these is the international highway which links Baghdad to the Hashemite Kingdom of Jordan, in addition to the international way which links Basra to Turkey through Zakho in the north and passes through Baghdad, the capital.
- There are a number of important railway lines which link north Iraq to its south. There is, for instance, (Baghdad- Mosul) and (Baghdad- Basra) railways.
- There is also one of the most important airports (Baghdad International Airport), which is located at the western part of Baghdad, 16 km away from the center of the city. In addition, there is a net of land roads which link Baghdad, the capital, to the international lines, such as, Jordan, Saudi Arabia, Kuwait, Iran, Turkey, and Syria.

• Education

Baghdad has four state Universities, Baghdad University (est. 1957), Mustansiriyah University (est. 1963), Technology University (est. 1974), and Nahrain University (est. 1980) and the Iraqi university. There is also the Technical Institutes Foundation (est. 1969) which turned to be (Technical Teaching Commission) in 2001. Fine Arts institutes (6) and teachers institutes (50). There are many private Universities and Colleges all over the city, in addition, there are almost 2474 primary school and 317 kindergarten, more than 1334 secondary school, and 97 technical institutes.

• Health:

Baghdad has 85 public and private hospital, 43 specialized public hospital, 19 general hospital, 4 pediatric hospital, 2 mother and child hospital, 2 maternity hospitals and 16 specialized hospital. In addition to 69 health center with 357 other health facilities.

- **Tourist sites**

Baghdad has many museums, most important of which are the National Iraqi Museum which exhibit the antique treasures of Mesopotamia Civilization, Baghdadi Museum for Folklore Arts. It has numerous mosques, religious shrines, such as Al Kadhimiya holy shrine, the Great Imam Mosque in addition to churches and cathedrals. 288 hotels are located in Baghdad in different ranks.

1. **Mustansiriyah School:** This had been the most important university in the Islamic world during the Abbasid era. It had gained a wide reputation in teaching Arabic language; Theology, Astronomy, Mathematics, Medicine, Pharmacology, as well as it had its own university hospital to train its students.

Historically speaking, Mustansiriyah School had been famous for its watch which had been functioning astronomically; in addition to pointing time, it depicted locations of sun and moon at any time.

2. **Abbasid Palace:** One of the important buildings in Baghdad traced back to the second Abbasid era. It is situated near Bab Al-Mua'dham, on the River bank. Historians assign its building to the Caliph Al-Nasir Li Deen Illah (575- 623 A. H./ 1179- 1225 A. D.).

3. **Murjaniyah School:** Murjaniyah School which is known today as Murjan Mosque is situated at Shorja quarter, Rasheed street. It was named so after Ameen Al-Deen Murjan who built it in 758 A. H./ 1357 A. D., i. e., almost a hundred year after the Abbasid era. In its early stages, it had been similar to the Mustansiriyah School, as it had classrooms and a dormitory department.

4. **Baghdad fence and its gates:** It is one of the most striking features of Baghdad. Its walls were built circularly; its four gates deviated with 90 degrees for defensive purposes. Administrative and religious buildings were at the city center so as people may reach them easily.

5. **Aqarquf:** This is an important historical city. It is one of the cities which were built according to Sumerian- Babylonian architectural concepts. It is situated on 30 km west northwards of the city center. Its building age traces back to the 15th century B. C. according to an order by the King Qurikalzo the first after whom it had been named.

Aqarquf was built on a prolonged scheme on natural limestone. The city took its water from a branch of the River Euphrates (Baiti Inleel), i. e., God Canal, according to the Babylonian naming. People dedicated for this God the city biggest temple. It is the creative God and God of air.

The most immanent thing one can see is the city Ziggurat, as it elevates to 57m above the plain surrounds it while the base was rectangular.

6. **Madaien:** This is one of the important historical cities the ruins of which erect on the eastern bank of the river Tigris, 30 km southwards the center of Baghdad. It was built during the 2nd century BC. Its most prominent features are its high arch, a part of a huge palace on the River Tigris. Its building time goes back to the middle of the 3rd century A. D. This Arch is the biggest and highest brick built Arch all over the world.

Its building design had been developed from genuine Iraqi style of architecture. Iwan (Hall) idea was developed from the ancient Iraqi buildings. Cities' entrances frontages and some Assyrian palaces provide clear order of the development of the idea of Iwan.

Province of Diyala

Historical Background

Ba'quba is the center of the Province of Diyala. All over the Province there are ancient buildings and historical sites which are considered as tourist sites. Most prominent of these sites are Prophet Danial Shrine, Tel Asmer, Tel Abu Uthaina, Tel Shihab, Zindan, the Abbasid Dam on the river Al-Uthaim, ancient Saray of Ba'quba, and the River of Wend). The Province is characterized for its historical hills which are traced back to the 5th century B. C.

Location

Province of Diyala is situated in the eastern part of Iraq, between the longitudes (34-36) and the altitudes (44- 46). The center of the Province is the city of Ba'quba, 56 km north east of Baghdad. It is boarded by the Provinces of Baghdad, Saladin, westwards, Sulaymaniyah to the north, Wasit and the Islamic Republic of Iran to the east. The main paved roads which link Baghdad to Tehran, Baghdad- Kirkuk, Sulaymaniyah and Irbil pass through the Province.

Area

The area of the Province of Diyala is (17.685) km² which represents 4% of the total area of Iraq.

Population

Population of the province is (1.660.007) person according to population growth in Iraq 2.8%

Main cities:

- Ba'quba District
- Baladrouz District
- Khalis District
- Mouqdadiyah District
- Khanaqeen District
- Kifri District

Economy at a Glance

The economic activities at the Province are concentrated in agriculture because of being situated on two main sources of water, Diyala River (a main affluent of Tigris River) and Uthaim River in addition to Himreen and Uthaim lakes with maximum storage capacity 5.5 bm^3 and Qazaniya and Mendly dams with storage capacity of 1.25 mm^3 . A large number of the manpower is employed in agriculture. Orange is widely grown in its orchards. Date palm trees are concentrated around Mouqdadiyah and run north towards Kifri. Olive, wheat, barley, and dates planting are common. The Province is also famous for cattle breeding, poultry, honey heaves, and fisheries.

The best part of its land is characterized by being fertile and plain, beautified by the mountains of Himreen and Zagros, the two lakes of Himreen and Uthaim, the orchards of date palms, fruits, farms of vegetables, grains, and dozens of factories.

Education:

The Province has only one University, University of Diyala and two private collages, Al Yarmook and Mesopotamia collages. There are more than 844 primary school in Diyala; 44 kindergarten, more than 409 secondary school; 15 technical school 2 institutes for Teachers' Qualifying, and one technical institute.

Health:

Diyala has 10 governmental hospitals, 3 private hospitals, 54 main medical center and 39 clinics.

Province of Saladin

Historical Background

Saladin is one of the Iraqi historical Provinces. Its center is Tikrit. It is essentially linked to the wake of civilization, almost 4,000 years ago. Its history has continued to be present during all the historical ages of ancient Iraq until the pre-Islamic era. The province has been named after Saladin Al-Ayoubi.

The Province is famous for the shrines of the Imams Al-'Askariyain (PBUT) (Imam Ali Al- Hadi and Imam Al- Hasan Al-'Askari 'PBUT') in Samara, Al-Malwiyah minaret, (Abbasid mosque), Ashiq Palace, Abbasid Caliph Palace, mosque of Abi Dulaf, the historical city of Ashour at Shirqat on the River Tigris, and overlooks, northwards, on a wide plain at the end of which is the present city of Shirqat, Tikrit fence, Nun monastery, and a number of the churches on both banks of Tigris at the city of Tikrit, and the Seeniyah Dome, northward the present city of Samara, near Ashiq Palace and the shrine of Saeed Mohamed, Son of Imam Ali Al- Hadi at the city of Balad, one of the important religious sites in the province.

Location

Province of Saladin is situated northwards Baghdad, the capital, and almost 165 km away from it. It is bordered by the Provinces of Nineveh and Erbil from the north, Kirkuk and Sulaimaniyah to the east, Diyala and Baghdad to the south and Anbar to the west. It occurs on the old Hajj route within a low area, almost 30 km from the village of (Rahba). It was built from rocks and gypsum.

Palace of N'uman Bin Al-Munthir:

Palace of N'uman Bin Al-Munthir is one of the palaces which date back to the ancient kingdom of Heera and the state of Akhminians Manathirah which enjoyed a major role in the Arab pre-Islamic history. Its monuments remained to cope with the historical events, it often enriched poets' imagination who chanted these monuments and ruins.

Province of Muthanna

Historical Background

The appearance of Warka City in the fifth millennium B. C. represents the first shift to the stable style of life and the early beginnings of the appearance of ruling régimes, writing, and laws which organized the social life in addition to developed Agriculture and availability of water resources which made \al Warkaa city the first spark in the Sumerian civilization.

Location

Muthanna province is located in the south part of Iraq, at the edges of the alluvial plain. The majority of its areas height varies between (70- 220m) above the sea level. The River Euphrates and its branches pass through it. It is the second water resource for agricultural crops irrigation. The Province is 270 km from Baghdad to the south. It is the second biggest Province, after Anbar, regarding its area. It has a desert climate, and its center is Samawa District and the province has administrative boundaries with Al-Najaf and Al-Diwaniyha from the North, Basra and Dhi Qar from the east, Saudi Arabia from the west and part from Basra and Kuwait country from the south.

Area

The area of the Province of Muthanna is (51.740) km², 12% of the total area of Iraq. The desert occupies 47.000 km², which means 91% of the total area of the Province.

Population: The population of the Province is (824.831) person.

Main cities:

- Samawa District (Center)
- Rumaitha District
- Khidhir District
- Salman District
- Warka District

Sawah Lake

Main activities

- Agriculture
- Industry, especially cement, bricks, concrete structures
- extractive industries
- Oil products and refineries
- Cattle breeding

Akad Heritage City

Economy at a Glance

The Province is characterized by the availability of the natural and human resources for investment, especially in the industrial sector. Muthanna province is rich with raw materials of the low cost in extraction and production, such as, limestone which is used in cement industry, sedimentary compounds of Sodium and Chlorine as salty compounds used in salt production. The Province is also characterized by lots of date palm orchards and its distinctive tourist site being near the Lake of Sawa and some tourist facilities. UNISCO approved the historian location of AL Warkaa to join the international heritage which granted the province an international reputation and importance.

Infrastructures

- The Province has a vital location in the southern part of Iraq on the International road linking Basra to Baghdad and international borders.
- (Baghdad- Basra) railway line, and the availability of a maintenance station for locomotives and train carriages.
- Oil refinery with 30.000 bpd capacity
- The strategic pipe line which transfers gas from the province of Basra to Baghdad passing through Muthanna Province.

Education:

The Province of Muthanna has only one University and (496) primary school; 21 kindergartens (154) secondary school; (2) institutes for Teachers' Qualifying, and 1 vocational institute.

Health

The Province has (4) hospitals and (57) medical center.

Tourist sites

Lake of Sawa: a closed salty lake located at the Province of Muthanna, southern Iraq, and few kilometers from the city of Samawa. The Lake is surrounded by a natural limestone wall which quickly repairs itself if broken due to fast hardening character of the limestone material in the water.

Historical tourist city: the location of historical Warkaa

Euphrates River

Province of Diwaniyah

Historical Background

It is one of the middle Euphrates Provinces that lies within the alluvial plain of Iraq. The name of the city first appeared during the eighteenth century. River Euphrates passes through the Province where it is known as Shatt Al-Diwaniyah. Diwaniyah is characterized by the fertile lands which qualifies it to be the food basket for the people at the area in specific, and for Iraq, in general.

Location

The Province of Diwaniyah is located at the southern part of Iraq, surrounded by Najaf, Karbala, Babylon, Muthanna and Thi Qar. It is characterized by agriculture, such as rice, and other agricultural crops.

Area

The area of the Province of Diwaniyah is (8.507) km².

Population: The population of the Province is (1.311.699) person.

Main cities:

- Diwaniyah District (Center)
- Shamiyah District
- Ifak District
- Hamza District
- Ghammas District

Main activities

- Agriculture (Prominently rice)
- Food stuff industries
- Textile industries
- Rubber industries (Tires)
- Cattle breeding
- White meats and eggs
- Bricks factories
- Oil industry (Dewaniya Oil refinery)

Infrastructures

There is a main road starts from Baghdad to Diwaniyah and a multi- track highway passes through the Province. The main Iraqi railway passes through the Province as well from north to south. Three generating stations are available in the province, two of them produce 300 MW and the third one produces 500 MW, in addition to the International Diwaniya Airport. It also has many industrial companies for rubber, textiles, dairy, cement, petrochemicals, and oil refinery.

Education:

The Province of Diwaniyah has only one university and some private collages and institutes, 666 primary school; 58 kindergartens, (249) secondary school; And a good number of private teaching.

Health:

Province of Diwaniyah has (9) hospitals, 4 specialized centers, (73) medical center in villages around the city and 3 working private hospitals and others under construction.

Province of Thi Qar

Historical Background

Thi Qar is one of the Iraqi southern Provinces. Its center is the city of Nasiriyah. Historical evidence indicates that this name exists from old ages. Some historical sites, such as, the ancient city of Ur, 5.000 years B. C. occurs there. It is the land where the Sumerians and Acadians settled.

Location

The Province of Thi Qar is located at the heart of the southern part of Iraq. The best part of the area of the Province is situated next to the Rivers of Euphrates and Gharraf. The Province is one of the most ancient lands settled by human being and established the first human civilization and there still lays the ancient archeological monuments of cities such as Ur and Lagash and else.

Area

The area of the Province of Thi Qar is (13,626) km².

Population: The population of the Province is (2.132.149) person.

Main cities:

- Nasiriyah District(Center)
- Rifa'i District
- Shatra District
- Suq Al-Shouyoukh District
- Al Jabaish District
- Al Garaf District

Aaqura Heritage City

Main activities

- Agriculture
- (Engineering and textile) industries
- Oil and gas production
- Cattle breeding
- Fishing

Archeological Harp

Infrastructures:

Thi Qar Province has an electric-thermal station that produces 600 MW , there is also Al Nasyriah Gas turbine station and an Oil Refinery with a refining capacity of 30,000 bpd, it has a good net of roads and transportation linking it to the neighboring provinces as there are many land roads. These are:

- Baghdad- Basra free main way
- Nasiriyah- Kut way
- Imarah – Ri'fai- Diwaniyah way
- Nasiriyah- Diwaniyah way
- Nasiriyah- Samawa way
- Nasiriyah- Imarah way

The Province is also penetrated by the railway which links Basra to the capital, Baghdad.

Education:

The Province of Thi Qar has two state universities, Thi Qar University at the City center and Sumer University at Ri'fai district and there are almost (1273) primary school; 40 kindergartens, (555) secondary school; (7) institutes for Teachers' qualifying, and many vocational institutes and schools.

Health:

There are 11 hospital and 138 public medical center in Thi Qar.

Province of Maysan

Historical Background

It is one of the southern Provinces of Iraq. It is located to the east of the country, on the Iranian borders. Its center is the city of Imarah. It is located on the River Tigris. It had been known, before 1976 as Imarah Province. It is believed that the origin of the name of "Maysan" refers back to the Kingdom of Mayshan, and turned, by time, to be Maysan.

Its distinctive location formed a core for an important city and commercial center and had been adopted by Alexander the Great as a capital for his kingdom. Among its common names "Korat Dijlah", i. e. a number of villages alongside the River Tigris.

Location

The province is located in the southern eastern part of Iraq, on the banks of the river Tigris. It is almost 400 km away from Baghdad. It represents a commercial center for agricultural crops, fish, and cattle. It is linked to the Provinces of Basra and Wasit by a 200 Km main road; and with the Province of Thi Qar through another road. An oil pipeline passes through the eastern part of the province and extends down to Basra and Fao southward.

Population: The population of the Province is (1,134.968) person.

Area

The area of the Province of Maysan is (16.072) km²

Main cities:

- Imarah District(Center)
- Maymouna District
- Ali Al-Gharbi District
- Qal'at Salih District
- Kahla District
- Mijar District

Main activities

- Oil
- Agriculture
- Cattle breeding
- Agricultural industries
- Sugar production
- Paper production

Education:

The Province of Maysan has only one university and (653) primary school; 31 kindergartens, (186) secondary school; (4) institutes for Teachers' Qualifying, and many vocational institutes and schools.

Health:

In Maysan, there are 6 hospitals and 80 general medical center

Province of Basra

Historical Background

Basra is the third Province in Iraq regarding population and considered as the economic capital of Iraq, its only port overlooking the Arab Gulf and its main sea outlet. Basra has several names mentioned by references, after building it, it was named Um Al-Iraq "Mother of Iraq", Khizanat Al-Arab "Treasury of Arabs", Al-Basra Al-Uthma "The Great Basra", Al-Basra Al-Zahira "Prosperous Basra", Thaghr Al-Iraq Al-Basim "The smiling mouth of Iraq", Al-Fayha "The extensive", Qubat Al-Ilm "Dome of Science".

Location

Basra is situated at the extreme south of Iraq, on the western bank of Shatt Al-Arab, the watercourse which results from Rivers Tigris and Euphrates meeting at Qurna, 110 km northward of Fao. Basra is almost 55 km from the Arab Gulf, 545 km from Baghdad. It has mutual border with Saudi Arabia Kingdom and Kuwait southward, and with the Islamic Republic of Iran Eastward. Local borders of Basra are with the provinces of Thi Qar and Maysan to the north and Muthanna to the west. Basra is the only port of Iraq and its main sea outlet.

From a geographical view, it occurs at the southern eastern corner of Iraq. This location has its impact in putting the province within the huge desert extension in the continents of Asia and Africa which consequently results in its overwhelming dry climate.

Basra, within its geographical location, is linked to the other provinces of Iraq through paved roads which lengths vary according to being near to, or far from it.

Area

The area of the Province of Basra is (19,070) km².

Population: Approximately (2,972.162) person.

Main cities:

- Basra District(Center)
- Qurna District
- Zubair District
- Shat Al Arab District
- Abu Al-Khaseeb District
- Fao District
- Allmdainah District

Main activities

- Oil and gas
- Sea charging and Railway
- Agriculture
- Food industries
- Heavy industries, such as, iron and steel, fertilizers, and petrochemicals
- Fishing

Economy at a Glance

Basra is one of the important provinces in Iraq, as it is rich with oil fields such as Rumaila field, Shi'aiba field, western Qurna field, and Majnoun field. Due to its location in the plains of Al Rafidain valley, it is considered as one of the best locations for planting rice, barley, wheat, and millet. It is also famous for cattle breeding. The province occurs on varying terrain land includes plains, upland, and desert and is also considered as a tourists Province for having many religious shrines and historical sites.

Infrastructures

Province of Basra has all the six Iraqi ports, including the deep port. Thus it is the transportation cross point of the southern part of Iraq. There is also a highway linking the Hashemite kingdom of Jordan to Iraq which starts from the Jordanian borders and ends in Basra. The province is also linked to the State of Kuwait via Safwan border crossing point, a main commercial outlet. In addition to these, there is Basra International Airport too.

Education:

The Province of Basra has only one university, University of Basra and (1198) primary school; 88 kindergartens, (632) secondary school; (14) institute for Teachers' Qualifying, and many vocational institutes and schools.

Health

Province of Basra has 19 hospital and (121) medical center.

Tourist sites:

Sindibad Island

This island is a marvelous tourist site which is located at the middle of Shatt Al-Arab, opposite to Shatt Al-Arab Hotel in Maqal. It is linked to both river banks via Sindibad Bridge.

It has wonderful gardens decorated with beautiful fountains. There are facilities for visitor comfort, a tourist coffee shop, and tourist houses for residence, in addition to the floating hotel near the Island, and a vast coffee shop at the southern end of the Island.

Qurna City: It is 74 km northward of Basra; Qurna is the legendary place of Adam's tree and paradise of Eden, where Tigris and Euphrates meet to form together Shatt Al-Arab, where we can see a lot of farms and orchards especially date palm orchards.

Abu Al-Khaseeb: This city is located on Shatt Al- Arab, 26 km to the south of Basra. It is the city of the late great poet Badr Shakir Al-Sayyab, it is also the center of date palm forests which are unique for their beautiful landscapes.

Investment Zones in Iraq

The National Investment Commission has started a program to prepare mechanism and a system to establish secured zones for investment according to the text of (Article 9 of the ratified amended Investment Law no. 13/ 2006 through cooperation with the Organization of Economic Cooperation and Development (OECD).

The National Investment Commission has formed up a strategy for the investment zones in Iraq through cooperation with the Investment Program in the Middle East and North Africa of the (OECD). A draft of the general principles for the feasibility study related to the experimental investment zone at the province of Babylon has been prepared and a draft of investment protection assessment for the sake of investors in Iraq has also been prepared. The program attracted a number of advisors, lawyers, financial experts and investors to contribute with their opinions and expertise so as to specify the conditions and situations which ensure the great advantage of investment.

The National Investment Commission is working on the following Zones to be prepared and announced as safe investment zones:

- Basra Investment Zone/ Khor Al-Zubair Zone.
- Babylon Investment Zone/ Hitteen Zone.
- Baghdad Investment Zone/ near the International Airport.
- Anbar Investment Zone.
- Middle Euphrates Investment Zone (between the Holy province of Najaf and the Sacred Province of Kerbala).
- Nineveh Investment Zone.
- Diyala Investment Zone/ New Camp of Iraq

1- Oil and Gas Sector

Iraq is blessed with vast reserves of oil and natural gas, and is one of the most promising, still largely undeveloped sources of hydrocarbon resources in the world. After decades of lack of investments due to wars and sanctions. The importance of oil is not only limited to its role in developing Iraq but exceeds that to the role which it can play on the level of the international oil market for the big reserves which can be reinforced in the future because of Iraq's being one of the most responding countries to the increase demand of energy and it is expected for Iraq to be the second largest international resource for the crude oil, this sector contributed to the GDP with the fixed price by %60 during 2015.. Iraq is actively seeking international investment and expertise to help in the development of its oil and gas sectors so negotiation rounds started and led Iraq for a new marsh in investment history. The Ministry of Oil announced new ambitious plan to increase oil production and exports during this decade depending on foreign investment as a main source to achieve this goal. The main way for investors interested in oil and gas sector is in oil bidding rounds announced by the ministry.

It's worth mentioning that the Oil Sector in Iraq has received a lot of attention from the federal government which resulted in developing its investment opportunities in addition to the announcement of the four bidding rounds , as mentioned above, these opportunities has enabled reputable international companies to enter this field. Iraq has signed contracts in 2010 and 2011 with international companies to develop its oil fields within the first and second biddings rounds and to increase the production level to reach (11) million bpd in the next six years and to (12) million bpd upon adding the quantities resulted from other fields by national efforts.

Most of these contracts focused on developing major oil fields in south of Iraq, in addition to that the third bidding round announcement was released to develop

three gas fields which are Ukaz in Ramdi Province, Mansouriyah in Diyala Province and Seebah in Basra Province.

On the other side, it is more likely that the oil and gas industry will continue to attract foreign business activities in the near future and that Iraq has a wide range of untapped oil and gas fields which requires a large number of investments to develop these fields.

Table (9): Oil & Gas Indicators

Fixed oil reserves	142.8 billion barrel
Unfixed oil reserves	215 billion barrels
Fixed gas reserves	130.9 Trillion Cubic Feet (TCF)
Estimated oil potential reserves	31 Trillion Cubic Feet (TCF)
Oil Production 2015	3.7 thousand Barrels/per day (bpd)
Oil Production 2016	4.1 thousand Barrels/per day (bpd)
Targeted production for 2020	4665 million bpd
Oil exports for 2015	3005 thousand bpd
Oil exports for 2016	3302 thousand bpd

Source: Iraqi MoO according to article no: 3911 in Jan.29th,2017

Oil:

There are 142.8 billion barrels of fixed reserves in Iraq discovered in 71 fields , 27 of which are developed and %75 of the fixed reserves concentrated in many major fields in the south east of the country near the Iraqi border with Kuwait and Iran. An additional %20 is located in the northern part of the country near Kirkuk.

Gas:

Iraq is similarly rich in natural gas, with 130.9 TCF in proven reserves, and an estimated 31 TCF in probable reserves.

Oil and gas export and distribution pipelines

Iraq has a wide pipeline infrastructure total of 4350 mile. There are three main pipelines that connect Iraq to Saudi Arabia, Turkey, Syria in addition to the forth one (the Strategic line) that starts from Basra in the south to Kirkuk in the north. This line exports three quarters of daily production from Basra oil port in the south and the rest from the north pipeline from Kirkuk to Jihan port in Turkey.

Production, Distribution and Export:

As Iraq is developing its infrastructure at the present time, and heading towards expanding its productive operations in oil field, and to attract investments in production, distribution and export fields for oil sector in order to improve the current situation of oil sector as well as it will help to attract investments in other fields such as export pipelines particularly in Basra Port, and the export pipelines from Kirkuk Province to Jihan Turkish Port.

There is a wide range of needs in the south of Iraq which includes the need to establish a new pipeline to link the resources extracted from oil wells to refineries and to establish storage facilities in addition to expanding the ports. A number of studies were conducted to develop infrastructure which would enable Iraq to gain its position as a source for natural gas and this requires constructing an expanded infrastructure for gas sector in order to enable Iraq to supply the gas pipelines heading to Turkey and therefore it will supply major European markets.

Investment Opportunities in the Oil and Gas Sector

Ministry of Oil announced an ambitious plan to increase oil production and exports in the following years. Participation and direct investments are principal means for achieving this goal through oil licenses rounds announced by the Ministry.

Investment opportunities in Refineries and Oil & Gas Projects:

No	Refinery Name	Refinery capacity	Contracting company	investment/funding	Location
1	Kirkuk Refinery	150 thousand	SHAW	BOO	Kirkuk
2	Al-Nasiriya Refinery+ oil field	300 thousand	Foster wheeler	two choices 1.funding and EPC 2.investment and funding and EPC	Nasiriya
3	Kut Refinery	100	-	BOO	Wasit
4	Al Simawa Refinery	70	-	BOO	Al Muthana

2- Electricity Sector

Electricity sector in Iraq presents a number of attractive investment opportunities to local and foreign investors. The government has ambitious plans aiming at raising the sector's capacity through motivating investors in the fields of building, operating and supplying.

The Ministry of Electricity (MoE) has sought to activate the role of the private sector in several fields like finance, quick construction and the contribution in raising the additional generation capacity to cover the country's need. The demand has grown furiously mainly by the essential consumer of electricity, families, in the recent years. Since the national power grid does not meet the local needs of the Iraqi families, they are forced to pay large amounts of money to be provided with electricity from the private sector.

MOE realizes that the current lack of electricity is the main obstacle for investments in all sectors since it is essential for the diversification of economy in the country, this sector has shared %1.1 of the overall local production in the constant prices for the year 2015.

It is planned for the power grid capacity to be (20,000) MW in 2016

Investment Opportunities Available in the Electricity Sector

No.	Project's name	Capacity Mega Watt	Implementation time	Province
1	Replace the south steam station project (160*3)	480	Maximum 2020	Baghdad
2	Al-Khairat steam Station Project 300*4	1200	Maximum 2020	Baghdad

3- Communication Sector

The communication sector (wired and wireless) has witnessed substantial growth in Foreign Direct Investment (FDI) attraction in the recent years especially in the mobile phones and internet technologies which can be highly attributed to the

existence of an independent organizing agency and the renewable opening up to the foreign companies.

One of the most important development points in the communication sector in Iraq was developing the local wired and wireless communication networks. Wireless networks have been capable of changing the land line phones market in Iraq as these are providing both of this old service alongside with the internet service without having to use cables through the populated neighborhoods of the city.

Government of Iraq contracted in 2006 with different companies from the private sector to provide the wired communication networks which provide the services of voice and data transmission. Communication and Media Commission also granted in the same year three national licenses and three regional ones for providing local wireless communication services, national licenses may last for 10 years that can be extended for 5 more years while regional licenses can last for only 8 years.

Which indicates the acceptable costs that can be afforded by many Iraqi families, with the government planning for a full coverage. In addition to that, the market remained open to the foreign companies to increase the national competition and prices comparison, as there are more than 3 main operating companies in the mobile fields in the country.

The communication sector is considered as one of the successful sectors in the period following the year 2003. With better security situation, better laws and fully free market, the climate will be more suitable to attract more local and foreign investments.

Investment opportunities in the communication sector*

1. Marketing a whole group of communication and internet services through Access Network (video calls, voice and data, high quality TV channels and games).
2. Investment in fiber optic cable along the country for communication and internet services.
3. Land and data inventory is being conducted in the companies relevant to Mo C to be presented to investment.
4. Marketing communication and internet services through sea and land outlet (international and local).
5. Secure, enhance and develop security systems in communication and electronic protection.
6. Partnership with international companies in:
 - A. Post packages
 - B. Activate saving sector role in using modern systems
 - C. Programing (electronic payment, electronic signature)

4-Health and Environment Sector

During the 1970s and 80s of the last century, the Republic of Iraq was considered as one of the leading nations in healthcare in the Middle East and North Africa. Sanctions imposed on Iraq in the 1990s led to deterioration in the healthcare system.

Today the Iraqi government works on changing the healthcare system to make a better one through investment in teaching, training and infrastructure. The government is committed to return the healthcare system to a better quality than before by increasing the health care budget, which indicates a fundamental change in the government priorities in this vital sector. There are 360 hospital and 1609 healthcare clinic located in the provinces and tens of thousands private medical clinics.

Health indicators is of great importance to growth, standard of living and human capacity building. It is well known that the health status of the people in any country is considered as a main factor in the economic growth of the country. In Iraq, the Ministry of Health is in charge of determining the health level within a large system of hospitals and different medical clinics in addition to the private health sector represented by private hospitals and private medical clinics.

Health Indicators reflecting the sector's status and development:

- Number of hospitals in Iraq (public and private) till 2013 is 360 hospital and 1609 healthcare center (except KRG).

Investment opportunities in health sector announced by the MoH

No.	Project name	Type of opportunity	Cost in USD	Province
1	50 bed hospital/ Al Yousfiya	new	40 m	Baghdad
2	200 bed hospital/ Amriya	new	120m	Baghdad
3	200 bed hospital/ Al Rifaae	new	118.5m	Thi Qar
4	200 bed hospital/ Al Suq Al Shyokh	new	118.5m	Thi Qar
5	Adding 100 beds to the pediatric hospital + new 50 bed Thelesiyima center	new	82m	Kirkuk
6	200 bed hospital/ Khanaqeen	new	117.5m	Diyala

Investment Opportunities in Health Sector announced by Provinces

No	Project's Name	Type of Investment Opportunities	Province

22.	1 Complete Medical City	New construction	Wasit/ Kut
23.	Medical Supplies and drugs Plant	New construction	Wasit/ Swaiyra- Kut
24.	1 General hospital 72% completed/ Al Mishkhab	Suspended due to financial problems	Holy Najaf
25.	1 General hospital 60% completed/ Al Huriya	Suspended due to financial problems	Holy Najaf

26.	Medical Supplies and drugs Plant/ plot 42/m 27 Kufa	New construction	Holy Najaf
27.	1 General hospital plot 25/2738 m5 Sadir Al Yousfiya (4 dunum) Efak	New construction	Al-Diwaniah
28.	1 General hospital plot 18/4105 m18 Um Abasyat (10 dunum) Al Shafiya	New construction	Al-Diwaniah
29.	1 Specialized Cancer Treatment Center plot 10.m1 Um Al Khail	New construction	Al-Diwaniah
30.	1 General hospital capacity : (100 beds) plot 5/1603 m2 Al Herd	New construction	Al-Diwaniah
31.	Psychology hospital plot 10.m1 Um Al Khail	New construction	Al-Diwaniah
32.	Gastric diseases hospital / plot 12/916 .m223 Abo Al Fadhil	New construction	Al-Diwaniah

Investment opportunity in Environment Sector

No.	Department	Project name	Location
1	Water & soil monitoring	Dust and desert control and monitoring center using remote sensors control	1. mid Euphrates (Karbala, Najaf, Babylon, Qadisiya, Muthana) 2. Southern area (Wasit, Maysan, Thi Qar, Basra)
2	Observe and asses industrial activities and services.	Monitoring gas and fine particles emissions due to polluted industrial and services activities.	Oil refineries, power stations, cement factories and hospitals in Baghdad and provinces.
3	Monitoring chemical materials and asses polluted sites.	Treating oil waste activities	- All oil fields in provinces, - Oil refineries - Leaks resulting from broken pipes- polluted soil
		Test imported chemicals, paints, toys in borders outlets.	borders outlets in Basra, Mayan, Wasit, Diyala,
		Hazardous waste control in borders outlets	Borders outlets (land, air, and sea)
		Treating chemically polluted sites.	All provinces, priority to the most contaminated sites.
		Electric and electronic waste recycling	Locations following environmental instructions regarding recycling wastes.
4	Climate changes and air type control	Supply and install fixed station for noise metering in all provinces except KRG	all provinces except KRG
		Supply and install fixed station for noise metering non- ionized ray in Baghdad and provinces.	Baghdad and provinces
5	Information technology	Develop the website by presenting electronic services	Baghdad/ Ministry HQ.
6	Planning and Technical follow up	Environment Clock for monitoring climate changes / cost I b ID	Baghdad/ green area

5- Housing and Infrastructure sector:

Economically speaking, housing is a very vital sector for the important roles it plays in the formation of the fixed capital, generating incomes and creating job opportunities and through the connection with other

activities. Many countries which enjoy financial surpluses go to maximizing the role of this sector, in other words considering it as a producing sector.

The Government of Iraq granted the private sector and the foreign investor the enabled role that may achieve touchable results in the housing production field by providing the lands suitable for housing purposes which will contribute to treating the problem of the residential slums and expanding in manufacturing the construction materials, taking into consideration the average growth of the Iraqi population and the fact of the need of 2 million housing units by 2015.

The contribution of this sector to the GDP in the fixed prices was approximately 85% for the year 2015, while contribution of this sector to the GDP in the fixed prices the years 2015 was 3%.

This sector greatly contributes to the increasing demand on the materials used in production in addition to addressing unemployment in Iraq. The National Investment Commission announced the

national housing project to build 1 million housing units in all provinces of Iraq and have already started the implementation of the first stage of this huge project through constructing 100 thousand units in Baghdad (Bismaiya New Housing City Project) implemented by Hanawah South Korean Company for Engineering &

Construction, to build. These 100 thousand units is part of Baghdad's total housing quota of 224 thousand units.

The following table shows the housing units needed by each province according to the database available at the Ministry of Planning:

Number of Housing Units that are to be implemented in each Province

Province/ Region	Number of units
Anbar	45 thousand units
Babylon	54 thousand units
Baghdad	224 thousand units
Basra	80 thousand units
Diwania	35 thousand units
Diyala	43 thousand units
Holy Kerbala	31 thousand units
Kirkuk	40 thousand units
KRG	140 thousand units
Maysan	31 thousand units
Muthana	22 thousand units
Holy Najaf	37 thousand units
Nineveh	101 thousand units
Saladin	39 thousand units
Thi qar	58 thousand units
Wassit	36 thousand units

NIC is supervising the implementation of the I million housing project in all Iraqi provinces through facilitating the process of allocating lands for investors, while a group of Iraqi banks (Rafidain Bank, Rasheed Bank, and TBI) are regulating the financial processes regarding this project.

The National Investment Commission has announced many housing projects as investment opportunities, among which are the following:

- **Al-Rasheed Housing City Project (Al-Rasheed Military Camp formerly) at the Province of Baghdad:** this project includes the construction of a modern city of approximately seventy thousand housing unit with integrated services, the project's infrastructure shall include sport, medical, commercial, and entertainment centers. (the project is not assigned yet to any company)
- **Dhifaf Karbala Housing City Project at the Province of Holy Karbala:** This project includes the construction of a modern city of approximately forty thousand housing unit with integrated services, the project's infrastructure shall include commercial, and entertainment centers. The project was assigned to Bloom Emirate Real Estate Company and Al-Handhal International Group.
- **Al-Mustaqbal Housing City Project at the Province of Baghdad:**
This project includes the construction of a modern city of an approximately thirty thousand housing unit, the city shall be supplied with the necessary services facilities. The project was assigned to Bloom Emirate Real Estate Company and Al-Handhal International Group).
- **Janatt Baghdad Housing City Project (Al-Dabbash Area formerly) at the Province of Baghdad:** This project includes the establishment of a vertical housing complex of twenty housing unit, the project's infrastructure shall include commercial, and entertainment centers. The project was assigned to Al-Hurra International Company.

7. Transportation Sector

It is one of the important economic sectors for its direct impact on the daily life of people and its tangled connection with the other economic sectors which can't be improved and developed without good infrastructure and efficient services of the transport system and all types of land usage requires a road net that meets its needs.

This sector is characterized by a big contribution of the local and foreign private sector and investments in implementing and operating lots of its projects.

The contribution of this sector to the GDP in the fixed prices was approximately %6.1 for the year 2015,

Iraq has planned to exploit its special geographic location in developing the transport sector in all its branches (land, maritime and air), the matter that will help in achieving the economic growth and creating lots of job opportunities in the international commercial businesses especially when developing the sector's infrastructure which will result in diversifying revenues and providing better services to people and all users.

7- Industry and Minerals sector

The Industrial sector is seen as one of the most prominent component of the non- oil economy, and the Ministry of Industry and Minerals (MIM) is considered as the main pillar for the industrial policy in Iraq which encourages investment according to investment law for the year 2006 as amended and it runs the state owned enterprises (SOEs) and seeks to develop these SOEs in cooperation with other sides willing to invest to raise efficiency of performance. MIM also specified a number of projects through which it aims at attracting foreign investments especially that this Ministry already has a number of investment bases and regulations.

Law No.22 for the year 1997 (regarding state owned companies) focuses on rehabilitating the operating plants which employ capitals and special expertise and it allows the SOEs to conclude agreements with foreign investors who will also be covered by the incentives and privileges provided by the investment law No.

13 for the year 2006 that encourages investment and it also provide protection to foreign investments in this sector among other economic sectors. The contribution of this sector to GDP in fixed price has reached (1%) for the year 2015.

MIM launched an ambitious program in 2005 for granting licenses to establish joint ventures and production sharing agreements for the purpose of promoting investment in this sector where investor should undertake all the rehabilitation processes, management and operating the plant at his own within the framework of the investment concept announced by the Ministry against a share of the production within a pre specified duration of 15-20 years, and the investor is free to suggest rehabilitation through rehabilitating the available machines and equipments or substitute all by new machinery, in all cases, the Ministry will be an active partner

and shall be ready to provide the investor with all available database in addition to helping in issuing the entry visas for the technical teams to the plant sites.

The developments in this sector included evaluating the suggestions to reduce the imports volumes to reinforce domestic products and ensure a package of comprehensive reforms which guarantee protection of investors' benefits and help to maintain a framework for the sustainable investment in SOEs, it is expected that the reforms package will not only lead to rehabilitate this sector but will result in producing new proactive energies and enforcing the available laws.

Iraq currently has diversified light and heavy industries like carpets, automobile assembling, pharmaceuticals, petrochemicals, fertilizers and other more industries. It is hoped that SOEs can play an important role in supplying both the state and private industries with the required products and services in light of applying a series of technical and management reforms and the investment directions to improve the quality of performance and production.

MIM has more than 72 SOEs that deal with various sectors which can be shown in the table below:

Sector	No. of companies
Engineering sector	28
Food & Chemical Industries	18
Construction	6
Textile	7
Services Sector	4
Others	9
Total	72

*according to Ministry of Industry & Mineral's letter/Investment Department, numbered 4571 on 21/2/2015

Most of SOEs works in low capacities for the following reasons:

- 1- Old machinery, equipment and production lines as most of them were provided during the seventies and eighties of the last century.
- 2- Old technology that does not match the international progress in the industrial sector
- 3- The unreliable national power grid that can't meet the electrical needs of industrial plants.
- 4- Domestic market opening up to imported products, the matter that impacted the competitiveness of the national products.

Consequently, MIM has adopted a plan to rehabilitate and develop most of SOEs through partnering with Arab and foreign private sector.

The Role of Government in the Industrial Sector

MIM is aiming at rehabilitating its companies or turning them into state or private joint stock companies and has announced a number of investment profiles for several companies, some of which have already been won by investors in order to be rehabilitated and operated, while issuance of investment law No. 13 for the year 2006 as amended has contributed much to reinforcing this trend.

Legal frameworks that govern the process of rehabilitating SOEs in addition to investment law can be shown below:

State companies' law No. 22 for the year 1997 as amended:

This law regulates the work of the state owned companies, the provision (15/3) of the same law allows the state company to conclude partnership with foreign company to implement a business that lays within the state company activities in Iraq depending on the legal basis for the partnership contracts included in the state companies law which gave the right to these companies to partner with Arab and foreign companies and enterprises to implement works relevant to the state companies objectives inside Iraq.

Public sector projects that are to be rehabilitated or operated with private and mixed sector, are covered with all privileges and guarantees prescribed in the investment law no.13 of 2006 (the first amendment of investment law no.13 of 2006 (Article 6/B), that was added to the text of (Article 32).The law applies to the projects agreed on and contracted before the enforcement of this law.

Companies law No. 21 for the year 1997 as amended:

Provision No. (8) of this law allows limited companies to form projects where the state contributes less than 25% of the capital shares.

Available Investment Opportunities at Ministry of Industry and Minerals announced as Investment Opportunities which includes (New Projects and Rehabilitation Projects)

Investment is based on partnership contracts with private sector according to Article 15/third, State Companies law no. 22 in 1997 amended, contracts can enjoy privileges in investment law no 13 amended Article 33/B.

Below, you can find the table of Available Investment Opportunities at Ministry of Industry and Minerals that are distributed in terms of the type of the project, form of investment and the Province the project is located in bases on management and production partnership, increasing the production capacity regarding rehabilitation projects and FDI for new projects.

No	Project	State Company	Investment type	Required investment	Location
1.	Abo Ghraib Diary factory	State Company for Food Industries	Rehabilitation and Development		Baghdad
2.	Starch and dextrin		Rehabilitation and Development	m.91\$	Babylon
3.	Nasir factory for tobacco and cigarettes		Rehabilitation and Development	m.55\$	Baghdad
4.	Dewaniya Diary factory		Rehabilitation and Development	-	Dewaniya
5.	Bricks Factory/ Baghdad	State Company for construction Industries	Rehabilitation and Development	\$ 50 m.	Baghdad
6.	Abo Ghraib Structures		Rehabilitation and Development	\$ 2.5 m.	Baghdad
7.	Thermo stone Factory		Rehabilitation and Development	\$ 25 m.	Baghdad
8.	Plastic tiles Factory		Partnership	\$ 5 m.	Maysan
9.	Bricks Factory/		Partnership	\$ 5 m.	Wasit
10.	Bricks Factory/		Partnership	\$ 5 m.	Dewaniya

11.	Chlorine Factory	State Company for Petrochemical & Paper Productions	Partnership	\$ 4 m.	Basra
12.	Paper Factory		Partnership	\$ 267 m.	Basra
13.	Cardboard factory		Partnership	\$ 156 m.	Basra
14.	Paper boxes		Partnership	\$ 220 m.	Basra
15.	Rubber Industries	State Company for Tires and Rubber Industries	Rehabilitation and Development	\$ 3 b.	Al Najaf
16.	Al Dewaniya Tires Factory		Rehabilitation and Development	\$ 70 m.	Al Dewaniya
17.	Babylon tires factory		Rehabilitation and Development	\$ 100 m.	Al Najaf
18.	Injection methods for rubber productions		Partnership	\$1.5 m.	Al Dewaniya
19.	Test lab for imported tires		Partnership	\$ 467500	Al Dewaniya
20.	Fans production Factory	Diyala State Company	Rehabilitation and Development	\$1.5 m.	Diyala
21.	Iron production Factory		Rehabilitation and Development	\$ 250000	
22.	Ignition Plugs production Factory		Rehabilitation and Development	9011111 \$	
23.	Cables Factory	Ur State Co.	Rehabilitation and Development	\$ 25 m.	Thi Qar
24.	Aluminum Factory		Rehabilitation and Development	\$ 15 m.	
25.	Medium pressure cable factory		Partnership	\$ 51 m.	
26.	Industry zone in Basra	State agency for industrial	Partnership	\$ 40 m.	Basra

27.	Industry zone in Thi Qar	development	Partnership	\$ 32 m.	Thi Qar
28.	Babylon Cement Factory	Iraqi State Company for Cement	Rehabilitation and Development	\$ 25 m.	Babylon
29.	Faluja Cement Factory		Rehabilitation and Development	\$ 33 m.	Anbar
30.	Limestone/ Gypsum factory		Rehabilitation and Development	\$ 20 m.	Holy Karbala
31.	Chloride Factory	State Company for mining industries	Partnership	\$ 43 m.	Baghdad
32.	Aluminum Powder factory		Rehabilitation and Development	\$ 2 m.	Baghdad
33.	Samara factory	State Company for medication and medical supplies / Samara	Rehabilitation and Development	\$ 41 m.	Saladin
34.	Investment of land and building in Karada		Lease	-	Saladin
35.	Street lightening factory	State Company for power and communication equipment	Partnership	\$ 3 m.	Saladin
36.	Electric equipment factory		Partnership	\$ 3 m.	Saladin
37.	Al Taji Factory	State Co. for leather and textiles industries	Rehabilitation and Development	\$ 9 m.	Baghdad
38.	Al Huriya Factory		Rehabilitation and Development	\$ 7 m.	Baghdad
39.	Handmade carpets Factory		Rehabilitation and Development	\$ 12 m.	Baghdad
40.	Al Fatih Factory		Rehabilitation and Development	\$ 11 m.	Baghdad
41.	Al Kadhimiya Factory		Rehabilitation and Development	\$ 8 m.	Baghdad
42.	medical swabs Factory		Rehabilitation and Development	\$ 3 m.	Dewaniya

43.	Al Hilla Textiles Factory		Rehabilitation and Development	\$ 33 m.	Babylon
44.	Plastic bags Factory		Rehabilitation and Development	\$ 12.5 m.	Babylon
45.	Men's clothing Factory		Rehabilitation and Development	\$ 23 m.	Holy Najaf
46.	Baghdad Leather tanning factory		Rehabilitation and Development	\$ 3 m.	Baghdad
47.	Steel project	State Co. for Steel	Partnership	\$612500000	Basra
48.	Pipes factory project		Partnership	-	Basra
49.	longitudinal welded pipes project		Partnership	\$ 300 m.	Basra

New Investment Opportunities Announced by private sector with different State share

New Cement Factory:-

- Province investment Commissions submitted their offers to Ministry of industry to establish Cement factories. Feasible and technical studies were reviewed by the ministry to recommend granting licenses according to the below table.
- A number of investment opportunities were announced to establish strategic projects provided 21-14% ministry participation from government funding. We believe that aborting all new projects due the current situation drive us to think of 100% investment funding.

No	Project name	Company name	%100 investment	Capacity per year	Location
1	Kaolin Alum Factory	State Company for Mishraq Sulfur	25 m USD	500,000 ton/year	Nineveh
2	Sulfuric Acid Factory		10 m USD	20,000 ton/year	Nineveh
3	Flat glass factory	State Company for glass and Ceramic	168 m USD	110,000 ton/year	Anbar
4	Cement Production Factory	Iraqi State Company for Cement	250 m USD	2 m ton/year	Muthana
5	Cement Production Factory		250 m USD	2 m ton/year	Karbala
6	Cement Production Factory		250 m USD	2 m ton/year	Anbar
7	Cement Production Factory		250 m USD	2 m ton/year	Najaf
8	Ducktail pipes factory	State Company for Mechanical Industries	260 m USD	55,000 ton/year	Babylon
9	Trucks factory		35 m USD	4000 truck/year	Babylon
10	Nitro fertilizers project	State Company for Fertilizers	800 m USD State shares 24%	1 m ton/year	Basra
11	Petrochemical project	State Company for Petrochemical Industries	10 b USD State shares 24%	1 m ton/year	Basra

8- Tourism Sector:

Iraq's cultural, religious and natural environment is regarded as an attracting factor for investors and visitors since it is a country of ancient civilization, international archeological sites and sacred religious sites in addition to the outstanding natural sites in the northern parts of Iraq.

There is a plan prepared by the government to develop and expand transport infrastructure to serve the largest number of tourists.

Tourism is regarded as an important factor of the economic and social development factors in the various countries and it represents a main resource of the national income resources which provide job opportunities through its different

projects and activities, accordingly; the government has been serious to lay down plans to invest the country's cultural and tourism components. The big changes that Iraq witnessed in all its economic and social sides have motivated the state to adopt active policies and programs to draw the development advancement features, the diversification and social mergers basement with putting investment plans for the coming years aiming at laying the foundations for an investment environment to improve the economic and cultural status supporting the Iraqi economic pillars and reinforcing the social security.

Ministry of Tourism and Archeology is considered as the Iraqi governmental side responsible for developing and sustaining the tourists sites in Iraq through developing required infrastructure and maintaining its genuineness and impact whereas this includes rehabilitating, maintaining and reviving specified sites, contracting with archeological establishments and holding official teaching and training programs.

There are lots of opportunities to invest and rehabilitate tourists' sites all over the country.

According to MoT letter 8839 in 15/2/2016

10. Education Sector

Sustainable development concept is always at the forefront of the international community interests, and since people has always occupied the first priority among the sustainable development factors, international world gave more importance to paying strong attention to develop the mental abilities and learning opportunities for human beings making education a human right for each individual in the society guaranteed by all international laws. The education standards in any country are seen as a measure for its advancement and development. In Iraq; laws guarantee the opportunity of obtaining good education for all Iraqis.

Education is still one of the greatest concerns of countries and despite the big progress in the primary education and the increase in the numbers of pupils joining schools and anti- illiteracy movements, big efforts are still being made increasingly to improve education quality by the government and it is still a big challenge for the developing countries including Iraq to keep pace with the intellectual advancement and skill development starting from kindergartens to high school levels.

Iraq is one of the most important countries that gave special attention to education system since the mid twentieth century, as it owns many reliable universities which are listed among the best ones in the Arab region. Iraqi universities were established in the beginning of the second half of the twentieth century starting with Baghdad University in 1957, Mustansyriah University 1963, whereas other universities were established after 1980 like University of Technology, Basra University, Mosul University, Sulaimanyah University in addition to a number of technical institutes. Iraq is in need for many educational institutions to meet the increasing demand as a result of population growth, the reality that provides investors with great opportunities to invest in this sector.

1- Primary Education

Through analyzing the most recent data for the year 2013-2014 issued by the central organization for statistics and information technology regarding the educational surveys we can find the following:

- Number of (morning and evening) primary schools in Iraq is (15807) for the school year 2013-2014, (26.4%) are for boys and (22.4%) for girls while (51.2%) are mixed schools.
- Number of the available pupils in (morning and evening) primary schools is (5558674) for the school year 2013-2014 where the girls' rate is (46%) and boys is (54%). Number of male and female teachers is about 287502.

2- Secondary Education

Number of (morning and evening) secondary schools in Iraq is (7083) for the school year 2013-2014,

Number of students of the secondary education schools are estimated by (2528133) for the school year 2013-2014. number of teachers is about 160323.

3- Vocational Education

Despite the significance of this educational branch, feeble attention has been forwarded to it comparing with other countries. The vocational schools in Iraq are divided into 4 sections, agricultural, industrial, commercial and fine arts and the number of these schools in Iraq is (597) for the school year 2012-2013, (67%) of which are industrial, (29%) commercial, (2%) agricultural and (2%) are for fine arts.

4- University Education (governmental, private and technical)

Surveys results have shown that the number of students admitted to Iraqi universities, private colleges and technical educational institutions reached (554,587) students for the year 2012-2013 while their number for the year 2010-2011 was (476,377) students

11. Services Sector

Services provision is considered as one of the main factors for a successful investment environment, so GOI has been serious to pay much attention to provide best services as it plays an essential role to achieve productivity and social stability.

The Government of Iraq has always sought to ensure the provision of good services and infrastructure and to display investment opportunities to the private sector with circulating a number of successful policies and programs in this regard.

After the restriction to regional traditional markets, Iraq markets have witnessed a big expansion with a shift in consumption, purchasing and entertainment patterns due to opening investment doors in this vital sector and the orientation towards constructing new commercial centers the matter that led to the large increase in the number of the commercial malls in the last three years with more new ones that are still under construction. Services sector participation in GPD is around 11% in fixed prices 2015.

Available Investment Opportunities in Services Sector

11. Youth and Sport Sector:

Youth and Sport Sector provides essential services for a successful investment environment, therefore; the government keens to secure this sector to provide services and care for youth since this sector has a great importance in increasing productivity and achieving stability and welfare for youth.

The government has sought to provide services and infrastructure in addition to providing investment opportunities for private sector to participate in developing this vital sector. The government has launched several policies and successful programs as Iraq's youth witnessed an intellectual expansion and a real desire to develop sport.

Different investment areas has been launched in this sector especially with the trend toward establishing new youth centers and forums which increased the number of these centers significantly over the last three years noting that there are several projects that are under implementation in this sector.

Investment Opportunities of Youth and Sport Sector announced by the Ministry of Youth and Sport

12. Agriculture sector

Previously, the agricultural sector achieved remarkable ratios to GDP due to availability of the basic factors to a successful agriculture where fertile plains, water of the Tigris and Euphrates rivers and wide lands, whether depending on irrigation or rain, as well as having good amounts of water sources with the availability of other human and material resources, so Iraq was considered a food basket for the Middle East and exporter of various agricultural products, but this sector deteriorated in the fourth quarter of the last century because of neglect, poor management of water resources and a growing population, and in spite of these challenges, the sector continues to play an important role in the Iraqi economy to its potential in employment which contribution to the GDP has reached at constant prices for 2015 up to (3%), while there are approximately (2,186,725) dunem declared by the Ministry of Agriculture, all of these ready to be invested. This sector is a promising one in terms of the multiplicity and diversity of investment opportunities and in the presence of the success elements of the work in this sector so as to ensure the diversity of the food basket and providing food security through agricultural relative investments of all kinds.

Investment opportunities in Agriculture sector announced by the Ministry of Agriculture
Areas for agriculture investment in Iraqi provinces except Kurdistan Region 2017

Table shows the number and area of investment opportunities in Iraqi provinces for 2017

No.	Province	Number of opportunities with available water, underground waters	total area / dunam
